

# Introducing Meeting Point Invitations

...a problem shared

How often does a situation arise that you need to share with colleagues and other Highlight users?

When there is an issue, opportunity or a discovery, it is best to get another pair of eyes to take a look.

More investigation or recommend more capacity?

**Invitations are the instant way to share.**

Watch the [online demo](http://reports.highlighter.net/demos/newfeatures/index.htm) and look for the new button in Highlight

Highlight's 'Send an Invitation' button on the Detail page sends an email to selected contacts complete with your message. The invitation links them to the exact Highlight view ( network location, date & time period) that you have chosen.

Click the Meeting Point entry to access the invitation and if necessary, request additional Highlight user
